

A woman with her hair pulled back, eyes closed, and a serene expression is holding a small, dark glass bottle of lavender essential oil. She is inhaling the scent from the bottle. The background is a soft, light blue gradient with wispy, ethereal smoke or steam rising from behind her. The overall mood is calm and relaxing.

Aromatherapy Collection

Biossentials trusted range of aromatherapy products and lifestyle accessories have been created with you in mind to gently balance, restore and rejuvenate body and mind. Our wellness collection is vegan-friendly and cruelty-free created from the very finest natural ingredients free from parabens, mineral oils, fillers, colourings, artificial fragrances and animal derived ingredients. Committed to your well-being and the health of our planet, our products have been expertly formulated by aromatherapy professionals to provide the very finest aromatherapy experience.

pure essential oils

Pure essential oils are derived from the precious living energy of plants including flowers, leaves, needles, bark, root, fruit rinds or resin. Highly concentrated, only a few drops of these precious oils are needed to enjoy their natural benefits. Every Biossentials Aromatherapy essential oil or blend is produced from a single distillation and is not diluted, modified, blended or adulterated. Like a vintage wine, each oil will vary in aroma, intensity and viscosity from year to year due to seasonal harvest conditions.

Biossentials single essential oils contain natural plant properties to balance, harmonise and restore body and mind. The art and science of Aromatherapy which recognises ancient and modern healing traditions, is based on utilising the therapeutic benefits of pure essential oils in a variety of ways. This includes aroma burner, inhalation, bath, foot spa, compress and room spray or blended in unscented carrier oil, balm or base products for skin and hair applications.

Every 10ml essential oil comes boxed with how-to-use instructions to ensure you have the very finest aromatherapy experience.

ultrasonic aroma diffusers

Create a healthy and relaxing aromatic environment in your spa, salon, business or home with Biossentials 100% natural essential oils and our new multi functional **Ultrasonic Aroma Diffuser**.

The heat-free aromatherapy diffusers use ultrasonic vibrations (up to 2.5 million vibrations per second) to instantly break down essential oils and water into tiny micro-particles dispersing them into the air in a fine aromatic mist. The mist penetrates the air more effectively, is absorbed more easily and optimises the therapeutic benefits of Biossentials pure essential oils.

The Benefits of Ultrasonic Diffusion include: Immediately creates a natural aromatic atmosphere

- Purifies the environment and minimises pollutants
- Heat-free for greater therapeutic benefits
- Moisturises the skin from drying effects of air conditioning
- No candles, quiet, safe and effective
- Auto shut off when waterless
- Calming mood light options to create the ambience you desire.

tropical diffuser reeds

Diffuser reeds are natural sticks used in reed diffusers to disperse fragrance into the air. Typically made from rattan or fiber, these reeds absorb scented oil from the diffuser bottle and release the aroma gradually, providing a continuous and subtle fragrance without the need for heat or electricity. They are a popular choice for home aromatherapy, offering a low-maintenance and elegant way to keep living spaces smelling fresh.

Each Aromatherapy Diffuser Reed set includes 100ml diffuser liquid, decorative glass diffusion container and highly absorbing rattan diffusion reeds, boxed.
